

THE STANDARD

OR

BEYOND THE STANDARD?

The worker on the left meets the Australian Standard ASNZS4602/1999 for night roadwork.

The worker on the right also meets the Australian Standard ASNZS4602/1999 for night roadwork, but is 400% more visible thanks to **EXELITE HIGH VISIBILITY SAFETY WEAR**.

EXELITE HIGH VISIBILITY SAFETY WEAR uses electroluminescent lighting to increase night time visibility to 800 metres.

How safe are your workers at night? For more information on the **EXELITE HIGH VISIBILITY SAFETY WEAR** range contact BAKER & FARROW PTY LTD today.

BE BRIGHT - INSIST ON EXELITE

Available from:

HOW SAFE ARE YOU WORKING AT NIGHT?

Both these workers are dressed to the Australian Standard for working at night. The worker on the left knows he's alright, he's wearing **EXELITE High Visibility Safety Wear**

EXELITE High Visibility Safety Wear can be seen up to 800 metres away at night without the need for any external light source. Standard high visibility clothing requires a light source to be seen and can only be seen to a distance of 200m

Increase your safety at night, insist on **EXELITE High Visibility Safety Wear**

LUMIMARKER

L-MARKER-RGB-6RF

REMOTE CONTROLLED LED ROADMARKER SET

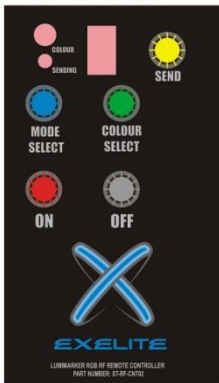

The EXELITE **LUMIMARKERS** are a breakthrough in high visibility safety. Using RGB high efficiency LED, the EXELITE **LUMIMARKERS** are a self illuminating, highly visible, portable, rechargeable, remote controlled safety beacon.

Featuring nine different colours and 9 flash modes the EXELITE **LUMIMARKERS** are designed for use by:

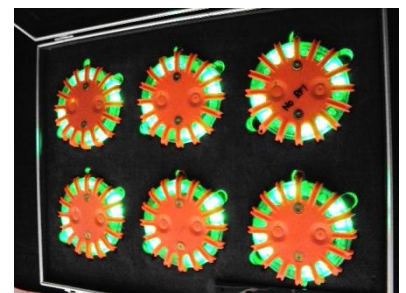

- Police, Fire & Ambulance
- Emergency Aircraft landing
- Utility Companies (Gas, Electricity & Water)
- Roadside Service Crews
- Truck Drivers
- Towing Companies
- Roads & Traffic Authorities
- Defence Force
- Marine rescue
- Mining Companies
- And many more

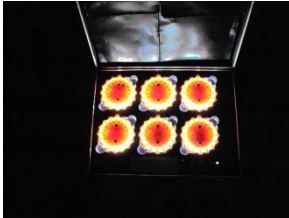

Remote controller graphics

The EXELITE **LUMIMARKER RGB-6RF** set is supplied in a rugged aluminium carry case. The carry case has a built in charge system and can be charged using either the 240V or automotive leads supplied with the set. The aluminium carry case is fitted with a control panel to allow you quickly and easily set your colour and flash mode prior to deploying the markers. Once deployed, the EXELITE **LUMIMARKERS** can be controlled by the supplied remote control. All colours and flash modes can be easily controlled using the remote control and additional sets can be programmed to operate off a single remote.

EXELITE LUMIMARKERS are dustproof, waterproof and even float making them ideal for use in extreme conditions. The individual markers are fitted with a magnetic base to attach to vehicles or signs and have been speed tested to stay on at 110Km/h.

EXELITE LUMIMARKERS are equipped with high efficiency Lithium – Polymer batteries and will last for hundreds of charge cycles. Depending on flash and colour modes the **EXELITE LUMIMARKERS** will run for up to 65 hours on a charge and take only 5 hours to fully recharge. The batteries will not develop a memory and can be recharged in any state, there's no need to discharge them before recharging thus ensuring they are always ready for deployment.

The **EXELITE LUMIMARKERS** can be customised to your requirements; colours can be deleted (and easily restored) to suit specific applications.

LUMIMARKER

L-MARKER-O

SINGLE EMERGENCY BREAKDOWN MARKER
